

AESTHETIC CHECK LIST

This check list is here to provide you with a list of the items and info needed to complete an aesthetic case.

1. Photos of pre-op teeth (1:1, 1:2 from various angles)
2. Impression or model of pre-op teeth
3. Photos of prepared teeth with shade tab.
4. Bite registration (bites of both prep and temp. Must be separate from stick bite)
5. Impression of provisionals (Gingival capture is as important as capturing margins)
6. Photos of provisionals (eyebrow to chin natural smile, 1:2 retracted, profile smile)
7. Horizontal plane guide (stick bite)
8. Detailed lab script thoroughly filled out.

Remember that the patient is not sitting in our lab, so pictures, models, and the lab script are all we have. Digital photography is a wonderful tool! The more pictures you send with the case the better.

This list of requirements provides all parties with the proper information to ensure the patient receives a beautiful, functional smile that will last for years.
